

# Moodle app: present and future

**Dani Palou**

Moodle HQ Developer

#MootUS18

# Moodle app 3.5.2

An orange starburst graphic with multiple points, containing text about release notes.

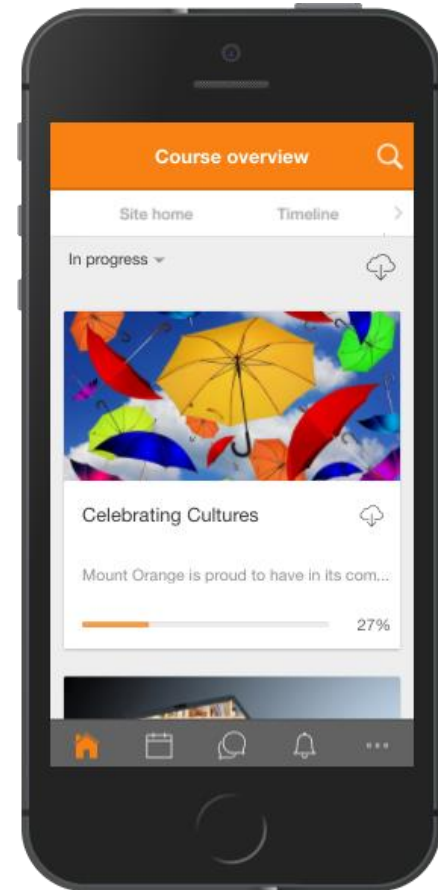

Release notes:

- ✓ [3.5.0](#)
- ✓ [3.5.1](#)
- ✓ [3.5.2](#)

- Better performance and user experience
- GDPR
- Support course formats
- Support RTL

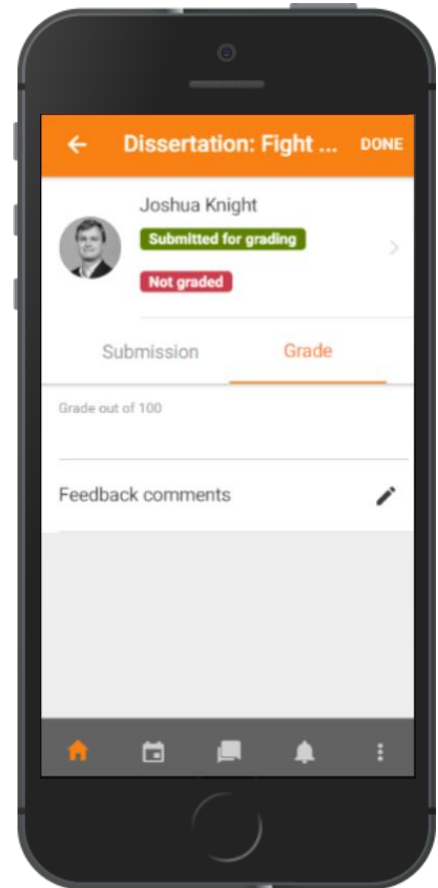

# Simple navigation

- Interface more modern
- Main options accessible from bottom menu
- Compatible with new features of Moodle 3.5, like course images in the user's summary view

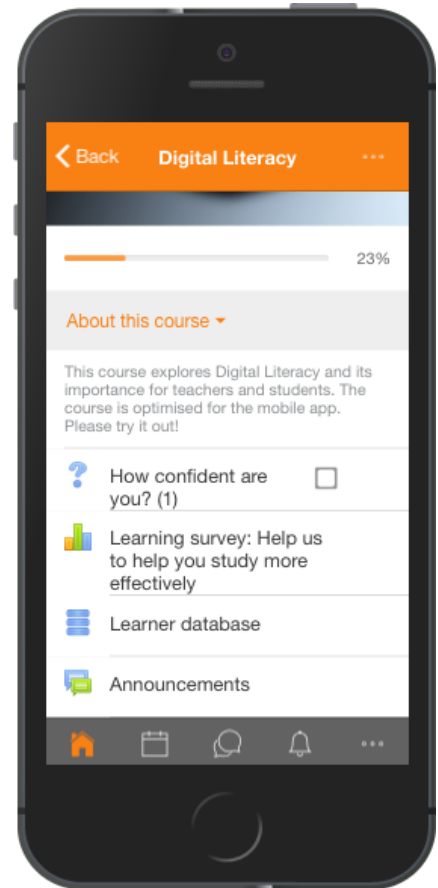

# Students fully supported

- All course resources and activities fully supported for students
- Limited functions for teachers, but they can evaluate assignments

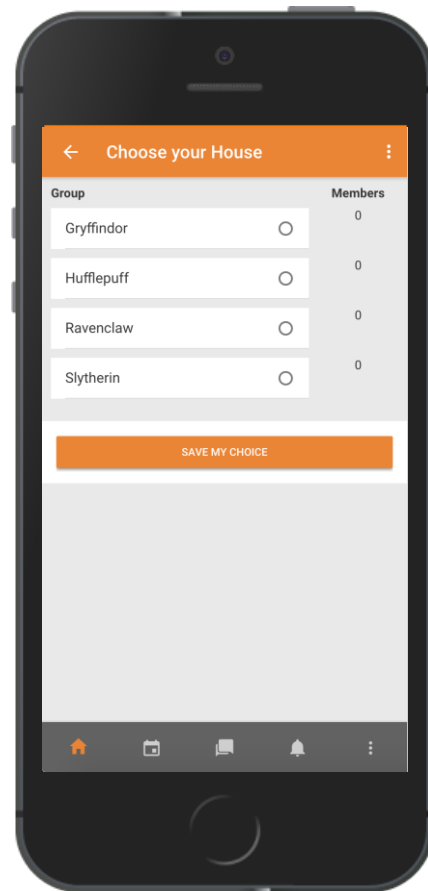

# No internet - No problem

- Can work without Internet connection
- Students can download courses, access resources and perform activities without being connected
- The app synchronizes the activity performed by the user once he reconnects again

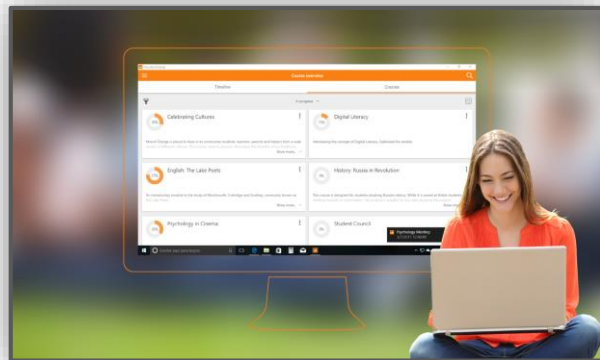

# What about 3rd-party plugins?

- Easier to make third-party plugins work in the app
- The plugin developer should adapt it to make it work in the Mobile app
- Some plugins are already adapted:
  - Certificate
  - Group choice
  - Gapfill question type
  - ...

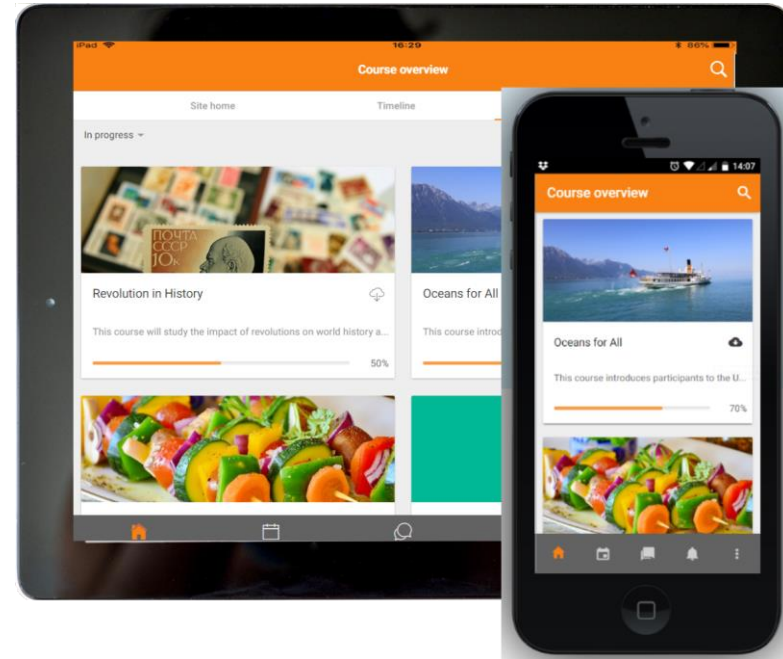

# Download it!

- Available for iOS and Android devices
- **Moodle App 3.5:**
  - Requires Moodle 3.1 onwards
  - Works on Android 4.4 or iOS 8 onwards devices
- **“Moodle classic”** for older versions

# Moodle Desktop

- All features from Moodle app
- Offline capabilities
- Available versions:
  - Windows 10 (64 bits)
  - Windows 7 & 8 (64 and 32 bits)
  - macOS 10.9 (64 bits)
  - Linux: Ubuntu 12.04, Fedora 21 and Debian 8 (32 and 64 bits)

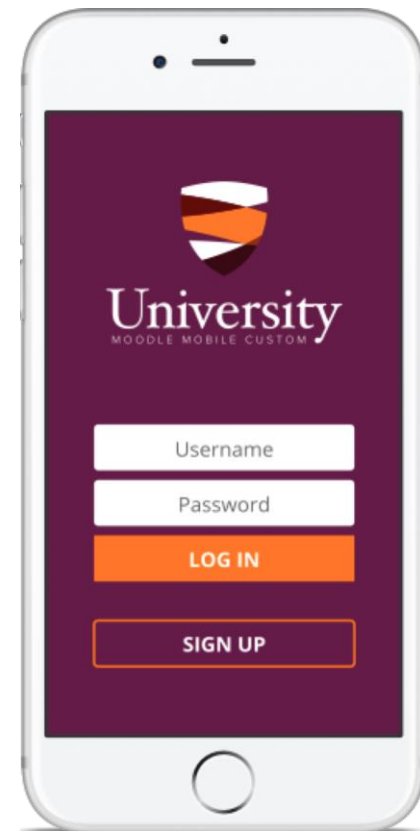

<https://download.moodle.org/desktop>

# Branded Moodle App

- Custom version for institutions and companies
- Corporate image and simplified login
- Own notification infrastructure.
- Maintenance and future updates guaranteed
- Allows to fund the development of the app

What's next?

MOODLE APP: FUTURE

# Moodle app 3.6 (1/3)

- New user dashboard
- Group messaging

Release in  
December 2018

# Moodle app 3.6 (2/3)

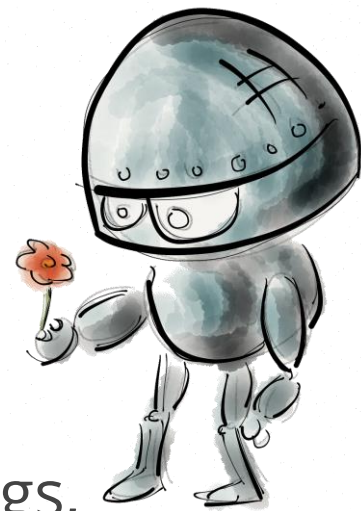

- Change activity manual completion in offline.
- Support “Activities” block in Site Home.
- Improvements:
  - In translations
  - In courses section navigation

# Moodle app 3.6 (3/3)

- Activity improvements, like:
  - URL: appearance settings
  - Workshop: submission type setting
  - Page: “Display modified date” setting
  - SCORM: new option to force new attempts
- Open Badges 2.0

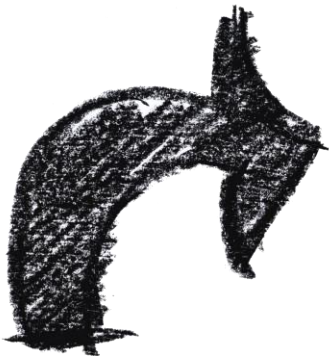

# More future features (1/2)

- More usability and offline improvements
- LTI 1.3 support
- Show blocks
- Support outstanding features such as blogs, global search, mentors...
- Allow the teacher to evaluate more activities
- Improve the integration with other Moodle services (MoodleCloud, MoodleNet)

## More future features (2/2)

- Support filters
- Improve user activity log system to include the dates of activities carried out offline
- Help plugin developers to make their plugins compatible with the app
