Rajiv Gandhi University of Knowledge Technologies (RGUKT), is a first of its kind green field university located in rural Andhra Pradesh with multiple campuses and headquarters at Amaravati.

Established in the year 2008, the university admits top 1% of the rural students into a six-year integrated bachelor degree program after class SSC.

The primary objective of establishing Rajiv Gandhi University of Knowledge Technologies is to provide high quality educational opportunities for the aimed rural youth of Andhra Pradesh.

Education at RGUKT is based on the intensive use of Information and Communication Technology.

Every student is provided with a laptop and the education is based on the latest advances in Learning Sciences such as 'Learning by Example', 'Learning by Doing' and 'Problem-based Learning'.

Technology Enabled Learning policy is developed in RGUKT in 2017 to enable the university to commit and enhance the deployment of appropriate technologies and resources to assist students and teachers create an environment of excellence in learning and teaching.

Implementation of TEL was done in several stages. This paper discusses about the necessity of TEL, action plan of implementation, the challenges encountered during implementation, and impact study.

THANK YOU
